DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-16, drawn to a vehicle stabilizer system, classified in class 280, subclass 5.5.
 - II. Claims 17-19, drawn to a method of stabilizing a vehicle, classified in class 280, subclass 5.5.
 - III. Claims 20-28, drawn to a harvester having a stabilizer, classified in class 56, subclass 210.
 - IV. Claims 29-35, drawn to a harvester system having a coupling between a towing and towed vehicle, classified in class 56, subclass 210.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and III/IV are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus as claimed, a harvester, can be stabilized by a different process.
3. Inventions I, III and IV are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant

Art Unit: 3671

case, the combination as claimed does not require the particulars of the subcombination as claimed because a harvester as claimed in claim 29 can be stabilized using a different apparatus than shown in the subcombination, claim 1. The subcombination has separate utility such as a vehicle stabilizer for vehicles other than harvesters.

This restriction is of the type described in M.P.E.P. 806.05(c)(III). In the instant application, claim 1 is the subcombination (Bsp), claim 20 is the combination/subcombination (ABsp), and claim 29 is the evidence claim (ABbr). Claim 29 is evidence that the subcombination is not essential to the combination.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
